SUMMARY

Enthusiastic Full Stack Developer focused on building responsive and user-friendly web applications using modern frontend technologies, with growing experience in Java-based backend development and SQL. Actively strengthening problem-solving skills through Data Structures and hands-on projects. Passionate about learning, experimenting, and turning ideas into real, working products.

EDUCATION

Nitte Meenakshi Institute of Technology

B.E. Electronics & Communication Engineering

CGPA: 8.53/10

Bengaluru, India

2023 – 2027

Mount Carmel PU College

Class 12 (PCMB)

Percentage: 93.3%

Bengaluru, India

2023

Delhi Public School Bangalore North

CBSE – Class 10

Percentage: 93%

Bengaluru, India

2021

PROJECTS

Smart Job Tracker & Application Analyzer (In Progress)

2026

React, Spring Boot, MySQL

Building a full-stack application to organize and track job applications with real-time status updates

Designing REST APIs to handle application data and enable seamless frontend-backend interaction

Creating a structured database to efficiently store and manage job roles, companies, and application progress

Developing a dashboard to visualize application trends and provide simple performance insights

AI Chat Application (ChatGPT Clone)

2024

JavaScript, HTML, CSS, REST API

Created an interactive chat interface that generates real-time responses using external APIs

Implemented asynchronous data handling to ensure smooth and responsive user experience

Designed a clean and dynamic UI with clear user-bot interaction flow

OLX Clone – Marketplace Web Application

2024

HTML, CSS, JavaScript, MySQL

Developed a web-based marketplace for listing, browsing, and managing products with category-based filtering

Implemented core functionalities to add, update, and display product data efficiently

Built a responsive interface ensuring smooth experience across devices

Connected frontend with database to enable dynamic content updates

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (Basics), C++

Frontend: HTML5, CSS3, Responsive UI Design, DOM Manipulation, React.js (Learning)

Backend: Java (Core), Basic Backend Concepts, REST APIs (Basics)

Database: MySQL, SQL (Basic Queries, Joins)

Concepts: Data Structures (Arrays, Strings - Learning), Problem Solving

Soft Skills: Communication, Team Collaboration, Adaptability, Quick Learning

Tools: Git, GitHub, Postman, VS Code

CERTIFICATIONS

Full Stack Java Development – Be Practical Tech Solutions (Ongoing)

Learning end-to-end web development using Java, Spring Boot, React, and MySQL with focus on building real-world applications and understanding REST APIs.

Data Analytics Job Simulation – Deloitte (Forage Platform)

Completed practical tasks involving data analysis, dashboard creation, and problem-solving using structured business scenarios.

ACHIEVEMENTS

Solved 80+ Data Structures and Algorithms problems (Arrays, Strings, Sorting)

Participated in Oddo x NMIT Hackathon with focus on UI design and planning

Strong analytical and problem-solving skills with aptitude practice

Academic excellence with 93% in 10th and 93.3% in 12th
