Objective

Aspiring Full Stack Developer with strong academic foundation and hands-on project experience. Passionate about building scalable web applications, problem solving and backend integration. Interested in building scalable applications, exploring Cloud Computing and Cyber Security concepts. Seeking internship opportunities to apply practical skills, contribute to real-time development teams and grow in the software engineering space.

Academic Record

B. Tech (ECE)	2023-2027	Nitte Meenakshi Institute of Technology, Karnataka	8.53/10
12th/PUC	2023	Mount Carmel PU College	93.3%
Class X	2021	Delhi Public School Bangalore North	93%

Projects

OLX Clone – Shopping Web Application (Frontend + Backend)

- Developed a marketplace style **buy/sell platform** where users can browse, post and manage product listings.
- Implemented responsive frontend using **HTML, CSS & JS** along with **backend integration** for product **data handling**, improving **user interaction** experience.

ChatGPT inspired AI Chat Application (connected with API)

- Created ChatGPT style chat interface with dynamic message alignment, smooth UI rendering and integrated API to fetch real AI response output.
- Built clean component-like architecture enabling scalable future feature expansion.

Oddo x NMIT Hackathon Project

- Built an innovative prototype during NMIT Hackathon focusing on real world problem solving, UI flow creation and feature planning.
- Contributed in design, team collaboration, requirement breakdown and rapid prototyping under time constraints.

Achievements & Interests

- Participated in Hackathon (Oddo x NMIT Hackathon)
- Built 2 practical software projects before final year
- Consistent academic performance (above 90% in 10th & 12th)
- Currently learning Frontend and Backend Development
- Cloud Computing and Cybersecurity learning in progress

Certification

- Full Stack Java course at Be Practical Tech Solutions
- Completed Data Analytics Job Simulation in Deloitte (Real task based industry workflow experience)
- Cloud Computing and Cybersecurity - currently learning foundational concepts

Strengths

- Quick learner, self-driven and also adaptable to new tools, environments, and requirements
- Strong communication skills with the ability to explain ideas clearly
- Problem solving mindset, responsible and well-organized in managing tasks and deadlines

Skills

- Languages:** HTML, CSS, JavaScript (basics), Python, C++, MATLAB
- Tools & Platforms:** Web: React (learning), Frontend Development, Cloud computing fundamentals (learning), Web security basics (learning)
- Responsive UI Design Tools:** Git, GitHub, VS Code, Postman, SolidWorks, MS Office.
- Domains:** Full Stack Development, Cloud, Web Security, Machine Learning.

- **Soft Skills:** Communication, Team Collaboration, Leadership, Task Coordination, Problem Solving
